

REFACE VS. REPLACE

*YOUR DREAM
KITCHEN AWAITS*

How the Window Store Inc Became the Trusted Source for Kitchen Updates

More than twenty years ago, while working with homeowners on their window updates, we would hear the horror stories of botched kitchen remodels. Homeowners were being charged filet mignon prices while being served bologna quality...

SOMETHING HAD TO BE DONE.

It was then we embarked on a mission to make kitchen updates simple *and* affordable. We developed an exclusive process that would provide a high-quality kitchen update without the major expense that comes with it.

Now, because of our Kitchen Refacing process, thousands of homeowners across the Twin Cities are enjoying their dream kitchen at a fraction of the cost!

Is Refacing Right for You?

- OUTDATED LOOK*
- KITCHEN DOESN'T MATCH HOME'S STYLE*
- WASTED SPACE*
- NON-FUNCTIONAL*
- BROKEN DOORS / DRAWERS*
- NEED STORAGE CUSTOMIZATIONS*
- WANT TO MODIFY THE SPACE*
- ADD / REMOVE / REPAIR CABINETS*
- ADD COUNTER SPACE*
- ...AND MANY MORE THINGS*

Things to Consider:

BIGGEST GOALS

What are the biggest concerns you have and how should your kitchen change to work for your home and lifestyle?

CURRENT LAYOUT

Are you happy with the current layout of your kitchen? If not, what needs to be moved or modified? Do you need to move plumbing or electrical?

TIMEFRAME

What is your ideal timeframe? Typical refacing takes only 3-5 days while your kitchen remains mostly functional, compared to a traditional remodel, in which replacing cabinets could drastically increase your timeframe and decrease functionality.

BUDGET

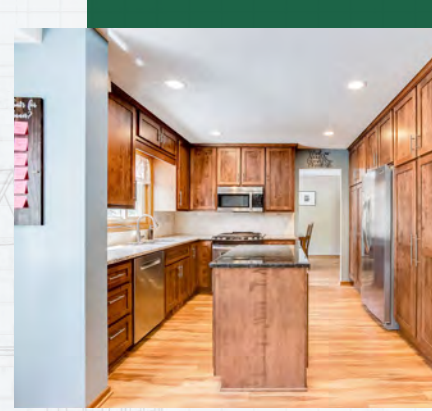

What is your ideal budget? Kitchen Refacing can be a perfect solution for those who may not want to invest in a tradition remodel but for a comparable option for return on investment.

What is Kitchen Refacing?

Our signature Kitchen Refacing process provides the look and feel of a brand new kitchen, without the high cost of a traditional remodel.

Through the last 20+ years, we've found that most kitchens have a solid cabinet structure — why tear out and replace good quality cabinet structures with (often times) a lower quality material?

Refacing maximizes your budget by customizing your already existing good quality cabinet structures.

How Does Refacing Work?

During the refacing process, we remove all of your cabinet doors and drawers. This leaves the “skeleton” of your cabinets.

Using the existing structure of your cabinet, we design and build the kitchen of your dreams.

With Kitchen Refacing, *YOU ARE IN CONTROL.*

5 Steps to Kitchen Refacing

STEP ONE

CHOOSE YOUR STYLE AND COLORS

We have thousands of color, design, species of wood and grain options to perfectly match your style.

Our design consultants can guide you through our many options to help you achieve the exact style you are wanting for your new dream kitchen.

STEP TWO

CHOOSE YOUR CUSTOMIZATIONS

Utilizing the existing structure of your cabinets, there is no limit to the amount of customizations we can do. From storage customizations to design modifications, our kitchen experts have done it all.

The Window Store has a vast amount of custom storage options that designed and built for your specific cabinet structure and lifestyle needs.

Needing some design modifications? Our experts are skilled at creating high-quality solutions to meet your specific needs.

Continue reading to learn more about our custom built storage options and design solutions.

Storage Customizations

Built and designed for your existing cabinet structure.

PULL OUT SHELVES

No more crouching over trying to reach the back of your cabinets. Pull out shelves make your entire cabinet space usable and easy to access.

THE KIDNEY BEAN

Even the most tricky cabinets are no match for us. The kidney bean allows you to use your entire corner cabinet. Often used to replace lazy susans, this solution easily glides in and out of your cabinet.

SPICE RACKS

A simple solution to utilize your small cabinet spaces in a big way. Our spice racks are designed to organize all of your spices in one convenient place.

COOKIE SHEET STORAGE

Say goodbye to waking up your family when trying to satiate your late night sweet tooth. Maximize your storage space and give your cookie sheets a quiet and convenient place to call home.

CEREAL STORAGE

Breakfast is the most important meal of the day and this pull out shelf makes it simple and easy! No more corn flakes making a permanent residence in the corners of your cupboard.

BEHIND DOOR SHELVES

Maximize your space even more by adding behind door shelving. These little upgrades can make a big difference in keeping your kitchen organized.

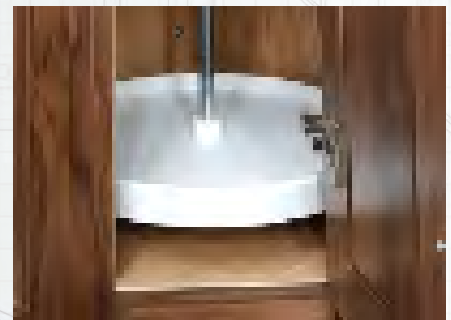

WINE RACKS

Take your kitchen up a notch with a classy wine rack. This storage option provides a convenient way to store your favorite wines and stemware.

LAZY SUSANS

The perfect solution for those tricky corner spaces or when you find yourself overwhelmed with clutter in your cabinets.

DRAWER SPACE OPTIMIZATION

While we are firm believers that every kitchen needs one junk drawer, maximize the rest of your drawer space with our custom drawer organizers.

Design Solutions

Our custom design team and cabinet builders go beyond traditional refacing to create high-quality solutions to meet your specific needs.

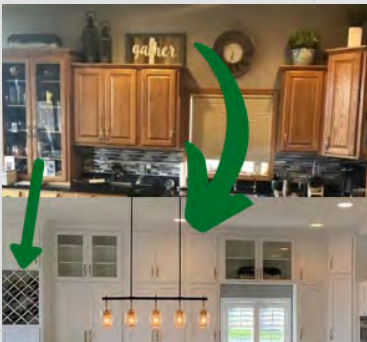

ADDING CABINETS / ISLAND

Create the space you want by adding custom-built cabinets or an island.

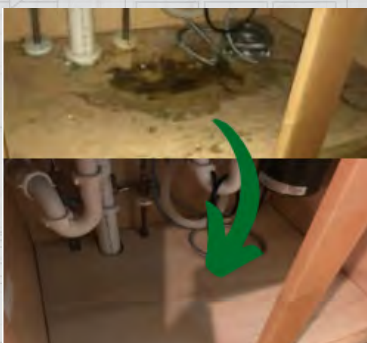

REMOVE CABINETS

Depending on your current setup, removing cabinets can be a great way to open up your kitchen. Our vast amount of storage solutions can help make up for any loss of space.

EXTEND CABINETS

Extend your cabinets all the way to your ceiling to give your kitchen a great new look and maximize storage.

FIX AND REPAIR CABINETS

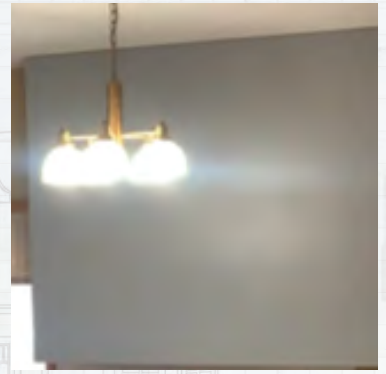

If some of your cabinets are structurally unsound, we can repair or replace them. We make sure all of our work is done with high-quality materials.

STEP THREE

INSTALL AN OVERLAY

After removing cabinet doors and drawers, our experts install a high-quality, real wood overlay that covers all of your exposed cabinets. Many kitchen refacing companies will “piece together” your overlay leaving unsightly seams. The key to our process is using a seamless overlay which leaves your cabinets looking cohesive and brand new.

Once your overlay is installed, our experts cut out the areas for your cabinet doors and drawers.

STEP FOUR

INSTALL CUSTOM CABINET DOORS & DRAWERS

Solid Wood Cabinet Doors

We install the cabinet doors you picked out at the beginning of your project. All of our cabinet doors are made from solid wood, which means they look amazing and are durable enough to last a lifetime.

Drawers

After your overlay is installed, we also install new solid wood drawers made with dovetail construction, giving your drawers an aspect of elegance and higher durability.

High Quality Hardware

Brand new hardware ensures everything opens / closes properly and smoothly, but also adds that extra personal touch to your new kitchen!

STEP FIVE

ENJOY YOUR BRAND "NEW" KITCHEN

The last and best part of this whole process is enjoying your brand new kitchen!

Kitchen Refacing

Kitchen refacing creates the kitchen of your dreams at a fraction of the cost of a traditional remodel. Prepare yourself to be blown away by how much you will love your brand *new* kitchen.

Replacing Your Cabinets

PRICE \$\$\$\$

CUSTOMIZATIONS ★★★★★

TIMEFRAME

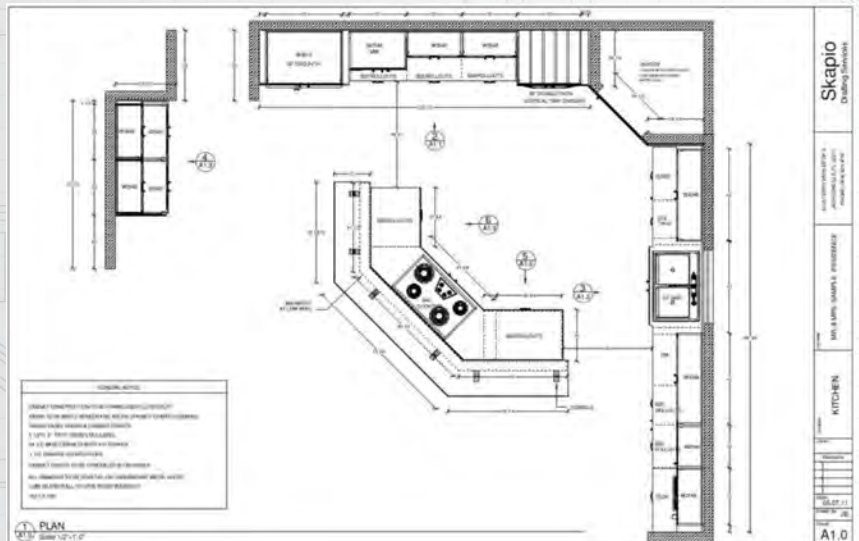

If you are looking for a completely different layout for your kitchen, including moving electrical and plumbing, then replacing your cabinets might be the best option.

Compared to refacing, replacing your current cabinets, or “gutting,” involves removing all of your cabinets including its structure.

While gutting your kitchen will increase your labor and material costs, and likely your timeframe, you have complete control of your new layout. Gutting your kitchen also gives you the ability to change locations of major plumbing and electrical outlets.

Our expert designers and installers can help you create the kitchen of your dreams! When replacing your cabinets, the options are endless!
